

INDUSTRIAL GRINDING MACHINE

MAXIMONSTER

Small grinding machine for **heavy**
duty grinding and polishing jobs.

4HP single-phase motor with variable speed (VS, with speed adjuster and adapter). For different types of preparation jobs, resins removal, concrete or marble grinding and polishing. Suitable for construction sites of different kinds.

Ergonomic handle

News in LMA: planetary industrial grinding machine of the Brutale series, perfect for heavy duty grinding jobs but also for polishing jobs in medium-space industrial areas and in small civil areas.

*Maximonster is designed to be the first grinding machine in the world to have an **ergonomic handle with rotation system**.*

Adjustable "drop" design metallic splash guard

which allows, during the dry working phases, to let the grinding powders flow back. no more clogging while working!

Fixed or mobile dashboard

- **FIXED DASHBOARD** which allows the operator to work behind the gear plate and check the work while grinding
- **MOBILE DASHBOARD** allows the operator to check the work and maintain the stability while grinding small areas, ideal for small-sized areas where the frame may be bulky and not easily manoeuvrable

Fixed or variable speed

Single phase motor with fixed or variable speed

Operating mode

with or without variable speed

Gear Plate

New generation GEAR PLATE with 3 Ø200mm AP attach tools holder discs with a working area of 500mm and new anti-vibration tool to soften the handle vibrations and to provide more stability

Handle

for lifting and checking tools

250mm

pneumatic wheels

Tank

20lt tank for water-based jobs
